

Instructions

Lab C

Task

Complete and submit exercise 10.3 with your group. The UML should not be hand-drawn, you can use the tool of your choice (e.g., draw.io, LucidChart) to complete your diagram.

Instructions

1. Identify your teammate(s).
2. Register for your group on D2L (*Communication > Groups*)
 - Be sure that you register for the group for the specific lab (Lab C)
 - If you register for the wrong group, ask for assistance in being placed in the correct group.
 - Your Lab C group will also be your group for the next lab, Lab C review (week 4). For the following lab (Lab D, week 5), new teams will be created.
 - During the review lab, your team will be reviewing another group's work and providing feedback.
 - Because we will keep the same team for next week, you may find it useful to sit in the same location next week to enable you to find your team members quickly.
3. Read the instructions for the exercise. Ask the instructor/TAs if you have any questions about the exercise.
4. Sit with your teammate(s).
 - You may remain in the lab if you would like to ask further questions, or you may go to another location.
5. Make your best effort to complete the exercise.
6. Upload your submission before the end of the lab period to the associated dropbox folder. Only one person in the group needs to upload the file.
 - The diagram should be submitted as #.pdf, where # corresponds to your group number, e.g., group 12 should submit a file called 12.pdf which is the UML diagram.
 - You should not include your student ID or names. Other groups will be anonymously reviewing your lab submission next week.
